# REVIEW

COVID 19 has brought many changes to our lives. It affected us from physical to mental level and has changed our way of living totally. Our carelessness has changed into protectiveness and we have become concentrated over prevention and protection. Covid was very tough on humanity. Thousands of lives were taken by it and the whole medical fraternity was working day and night for better outcomes. With all, covid 19 and period of lockdown has taught us that stagnation is nowhere an option. No matter how the time and situation is, but, we must keep ourselves motivated and working.

Faculty of homoeopathy has bucked up with the time and grabbed this opportunity to rise, learn and teach more. During online classes where teachers were keeping good record of student progress, homoeopathic

colleges have conducted many webinars, seminars and even e-visits to teach children.

We made all possible efforts to make online classes an effective program to teach and now when the permission to offline classes has been granted, we are proud to share that homoeopathic faculty was first to start the online as well as offline classes with good strength of students.

Lot many events, activities, seminars and expert lectures were conducted in the campus after the lockdown and this is our initiative to bring all such activities, conducted by the faculty of homoeopathy, on one platform through this first edition of "HOMOEOSPARKLES". We are very optimistic that homoeo-sparkles will bring more positivity and motivation among students
