REPORT OF EDUCATIONAL TOUR 2023-2024

04.04.2024

As a part of academic activity a tour was organized by Parul Institute of Homoeopathy and Research for the first year students in Parul Institute of Medical Science and Research on 4th April 2024. The students on that day were in a joyous mood and enthusiastic manner as they were going to visit the Medical College for the first time. We reached the Medical College sharp at 9:00 am. The Medical College whole heartedly welcomed us; Dr. Parmar, Dr. Jagdish soni & Dr. Dinesh Chaudhary was our guide that day as they were going to show us the Dissection Hall, Anatomy Museum, Histo-Pathology Lab.

1. Dissection Hall

The Dissection Hall of P.I.M.S.R was extremely large which has the capacity of teaching 150 students at a time in 15 groups. We enthusiastically observe that dissection hall has two storage tanks room in which 15 undissected cadavers were stored and 8 dissected cadavers were stored. The staff used to store the cadavers by embalming the bodies with the help of embalming machine in which they used to pierce the injection in Femoral or Carotid Artery and enter the fluid for embelamation. They have two mummified bodies for surface landmarks. Having the facility of mortuary room (Cold Storage) for storing the cadavers. They have large amount of dissected organs like upper limb, lower limb, brain, lungs, liver, heart which used to store in large medical containers and buckets. They used to preserve the cadavers by making a fluid which contains mixture of formalin, glycerine, distilled water and spirit which makes 10 litres of preserving fluid per cadaver. The dissection hall has 3 articulated skeletons.

2. Anatomical Museum

The Museum has a brief collection of each and every part of body original as well as the nodels through which the students can clear their doubt easily. They have the perfect

Parul®
University

NAAC A++

PARUL INSTITUTE OF
HOMOEOPATHY AND
RESEARCH
DEPARTMENT OF ANATOMY

description of each and every part on a chart as well as on the designated labelled plate. Museum contains skeletons of both male and female and one diseased skeleton. The museum has a collection of different stages of foetal life and original foetus of different stages. The museum has all the parts of upper limb, lower limb, head, thorax, abdomen and models of muscles as well as the original connection of muscles. The most interesting part of the tour was the visit to anatomical museum where both the teachers of anatomy Dr. Jagdish Soni, Dr. Bhakti Pathak and Dr. Puja Chajer was clearing the curiosity and doubts of the students.

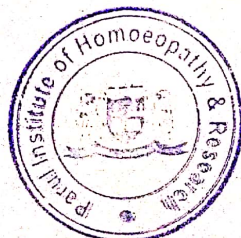

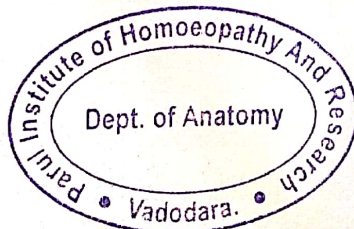

3. Histo – Pathology Lab

This lab prepares the slide of every tissue. The lab has 90 microscope facility and every desk has the gas burners for the convenience of the students, here the walls of lab were affiliated with charts and labelled diagrams of the slide of tissue as they used to appear under the microscope. There were also the models of embryology and the Medical College has gifted 62 slides to our college.

We all students were thankful to our college for giving us this precious knowledge and a great visit to medical college. We leave the medical college by taking some good memories in the heart, mind and cameras with some of the best teachers.

Details about the activity:

As a part of academic activity a tour was organized by Parul Institute of Homoeopathy and Research for the first year students in Parul Institute of Medical Science and Research on 4TH April 2024. The students on that day were in a joyous mood and enthusiastic manner as they were going to visit the Medical College for the first time. We reached the Medical College sharp at 9 am. The Medical College whole heartedly welcomed us; Dr. Parmar, Dr. Jagdish Soni & Dr. Dinesh Chaudhary were our guide that day as they were going to show us the Dissection Hall, Anatomy Museum, Histo-Pathology Lab.

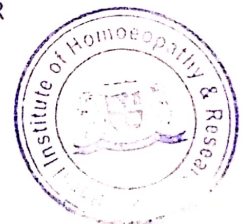

Outcome/Feedback

The purpose of visit was, students can enhance knowledge of Anatomy in practical aspect. Students visited dissection hall, museum & histology lab. They get the exposure of different foetal bones. The students see the mummified body for the first time in their life. There was huge collection of different specimen in the museum.
