It was a wonderful event we got to know about various types of Human Gestures which are usefull in our day to day conversation and as a Homoeopath it plays an important role in our case taking.

It is said that our conversation is 20% vaurbal and 80% it is these Gestures which lead the conversation.

It was a great event and was with full of knowledge and insightful we are glad to Dr. Hiral Ma'am to organize this event.

At last it ended with all singing National Anthem.
