RAJKOT HOMOEOPATHIC MEDICAL COLLEGE
RAJKOT.

Training session on Basic Life Support protocol was organised by PG scholars of department of practice of medicine, Sainath Homoeopathic Hospital on 13/06/2024, Thursday for the PG Scholars (Batch 2023-24) of Rajkot Homoeopathic Medical College, Parul University at Skill Laboratory for continuous quality improvement and hands on training based learning for students.

AIM OF BLS TRAINING :

Help oxygenate and circulate the blood until medical help arrives

OBJECTIVES OF BLS TRAINING :

To provide oxygen to the heart and brain to sustain tissue viability until definitive electrical or medical treatment can restore spontaneous circulation.

INTRODUCTION :-

Basic life support (BLS). Generally refers to the type of care that first responders, healthcare providers, and public safety professionals provide to anyone who is experiencing cardiac arrest, respiratory distress or an obstructed airway. It requires knowledge and skills in cardiopulmonary resuscitation (CPR), using automated external defibrillators (AED) and relieving airway obstructions in patients of every age.

Basic life support (BLS) includes recognition of signs of sudden cardiac arrest, heart attack, stroke, and foreign body airway obstruction, and the performance of cardiopulmonary resuscitation (CPR) and defibrillation with an automated external defibrillator

In the case of an emergency, fast and structured patient management is crucial for a patient's outcome. In order to manage common emergencies every medical student and graduate should possess basic knowledge of emergency care and the skills necessary for dealing with these situations. Adequate education in first aid and basic life support (BLS) should be considered as an essential aspect of the medical curriculum.

ELEMENTS OF BASIC LIFE SUPPORT

1. Initial assessment
2. Airway maintenance
3. Expired air ventilation
4. Chest compression

STEPS FOR BLS TRAINING :

1. Check for responsiveness
2. Call for emergency medical services (EMS)
3. Begin chest compressions
4. Provide rescue breaths
5. Continue CPR
6. Use an AED (if available)

CONCLUSION :-

All over it was very informative and skillful training session. CPR is crucial life saving treatment that can mean difference between life and death. Learning CPR is easy and simple and anybody can do it to save a life in an emergency. At last all the participants receive a certificate.
