### Observations noted:

- Hospital doesn't have proper ICU upto the mark. ICU with minimum 2 ventilators and proper medico/paramedic staff is mandatory.
- Hospital setup Ob & Gynec cluster is General Surgery and Otolaryngology but they don't have separate operation theatre for Ob & Gynec. Separate operation theatre are required for the same.
- There are ceiling fans in ICU & OT, which need to be replaced.
- Campetial bed arrangements and hygiene issues.
- Upon audit it has been noticed that hospital is segregated for Ayurvedic treatment and dedicatedly working in same field. There is another unit of hospital in same campus already empanelled for PM-JAY-MA scheme and properly working.
