Sub: - Asking permission of Institutional visit to Tarsali Sewage Plant Visit.

Respected Sir,

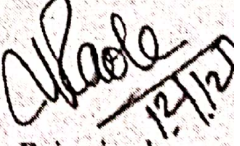

With reference to above, I would like to state that Parul Institute of Ayurveda is running B.A.M.S. Degree course at Limda, Waghodia. As a part of 3rd year Curriculum of Swasthavritta subject (i.e. Preventive & Social Medicine), certain visits are essential, Sewage Plant Visit is one of them.

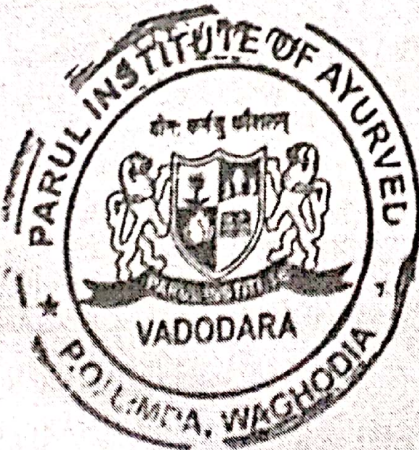

So, I kindly request you to permit our students & do the needful for visit to Sewage Plant, Vadodara. The number of staff & students for this visit will be 100 + 2 & our institute wishes to arrange this visit on Date: 23/12/2019.

Thanking You

Yours faithfully,

Date: 12/12/2019

Sub: Submitting the visit report of Sewage Treatment plant, Tarsali, Vadodara

Respected Sir,

As per the part of CCIM curriculum, 100 students and 2 staff members visited the Sewage Treatment plant, tarsali, Vadodara on 23/12/2019. The staffs explained all the functioning, different areas etc in the sewage. They showed the tanks like Screening, Grit chamber, Primary and Secondary settling tanks, Aeration tanks, Sludge digesters, Sludge drying beds, Laboratory etc. Students also visited the river outfall and sludge drying beds. It was good and knowledge giving tour for us. Manager and other staff of plant were very co-operative & give us every detail which will definitely be helpful in our academic knowledge. Thank you Sir for granting us the permission for visit.

Yours faithfully,

27/12/2019

Visit To Sewage Treatment Plant Vadodra

Vadodra, 23rd December, 2019

Pareul Institute Of Ayurveda, Department of Swasthveit, has organized visit to Vadodra Mahanagar Sevashram, Taresali on 23rd December, 2019.

3rd year students of Pareul Institute of Ayurveda reached to Vadodra Mahanagar Sevashram Taresali at 10:00 AM. Officer of sewage plant oriented to us (3rd year students) about sewage treatment plant process. Initially the process begins with first process where sewage water comes and it goes under purification. In that process large material like plastic bottle and some other objects are removed through screening process in screen chamber. Then that water goes under grit chamber where slow down the flow so that solid such as sand, coffee grounds and eggshells settle out of the water. After that water goes under Aeration tank where biological treatment of water takes place. After that water reaches at primary sedimentation tank and then

Mr. GVS took up part in photo session.
